

LinkBoard

A web-app dashboard for links

Introduction

1. LinkBoard is a webapp dashboard made with streamlit.
2. It uses a links.json file to input the actual contents.
3. This links.json is made using a links.xlsx file where users can comfortably add information. (a converter script converts xlsx to json)
4. These links originate from already present webpages. List of currently used webpages is as follows: ['heavyfetish.com', 'www.eporner.com', 'tube.perverzija.com', 'www.fuq.com', 'www.tubebdsm.com', 'punishworld.com', 'bdsmstreak.com', 'm.hqporner.com', 'www.pornhits.com', 'spankbang.com', 'www.txxx.porn', 'beeg.com', 'www.porntry.com', 'abjav.com', 'abxxx.com', 'www.tnaflix.com', 'pornxp.com', 'curebdsm.com', 'hcbdsm.com', 'www.porntrex.com', 'txxx.com', 'xhamster44.desi', 'punishbang.com', 'spankbang.party', 'txxx.me', 'www.porndead.org', 'xhamster18.desi', 'netfapx.net', 'pornzog', 'www.tubegalore.com', 'pervtube.net', 'www.pornhub.com', 'anyporn.com', 'www.porntopedia.com', 'www.peekvids.com', 'www.omg.xxx']
5. The filters on the webpage contain:

Duration	Slider
Rating	Slider
Core Category	drop down multiselect
Other Category	drop down multiselect
Actors	drop down multiselect
Studios	drop down multiselect
Positions	drop down multiselect
Tag search	free text field

6. The contents mean:
 - a. Duration (duration of video in minutes)
 - b. Rating (rating out of 10)
 - c. Core Category (main category of the video)
 - d. Other Category (other smaller categories for the video)
 - e. Actors (adult stars who work in that video)
 - f. Studios (studios which make video)
 - g. Positions (sex positions seen in the video)
 - h. Tag search (comments written by user about things they liked in the video)
7. There are filters (radio buttons) to sort by Duration, Rating, Both. There is also stronger preference radio buttons if user needs to 'bias' towards Duration or Rating.
8. Rendered using streamlit dashboard and therefore written in python

9. The flow is:
 - a. Type contents to links.xlsx
 - b. Convert to links.json with a batch file (which runs xltojson.py)
 - c. Launch app using a batch file (which runs app.py)
 10. The links.xlsx headers are:
 - a. main_link
 - b. duration
 - c. studio
 - d. star_1
 - e. star_2
 - f. star_3
 - g. core_cat
 - h. cat_1
 - i. cat_2
 - j. cat_3
 - k. cat_4
 - l. cat_5
 - m. cat_6
 - n. pos_1
 - o. pos_2
 - p. pos_3
 - q. language
 - r. rate
 - s. general_tags
 - t. website
 11. The links.json structure is same as the headers of the excel but with each video being an entry.
-

Future scope

Include titles, thumbnails, and directly play the video inside the website. Best preferred layout would be a horizontal layout with left part being the thumbnail and the direct video below the thumbnail, and right part being the textual information about the video including title. Example is attached:

Piper Perri and Phoenix Marie Submit

Duration: 85 min | ★ 7

Studio: the upper floor

Core: bdsm-soft-male-dom

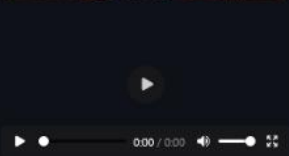

Stars: piper perri, phoenix marie

Categories: 2f, flogging, lesbian fisting, tongue clothespin, ass up face down, anal cum

Positions: arms up tied, horizontal pretzel, double 69

Tags: pick up and fuck at 35m, blindfold cunnilingus at 28m, pussy on pussy at 56m, ass to mouth and dick to ass at 1hr18m

[Open](#)

Melody Marks

Duration: 47 min | ★ 7

Studio: dungeon corp

Core: bdsm-hard-male-dom

Stars: melody marks

Categories: ball gag, flogging, nipples binder clips, fucking machine, clit suction, tits suction cups

Positions: hogtied, arms up tied, lay down

Tags: fondling at 4m, hand spanking at 4m, tit flogging at 5m, ass flogging at 14m, nipple binder clips tied to toes at 32m, vibrator and flogging and blindfold at 45m

[Open](#)

Sample links from xlsx and json:
